# PBX Minimal Setup

- What is a PBX?
- Hardware
- Software

# What is a PBX?

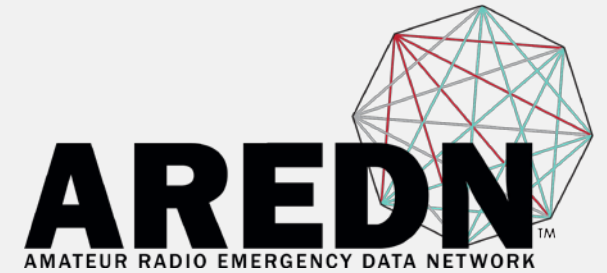

- A PBX is a central server to which all phones connect. This server enables any phone to call any other phone on that server.
- It also has other features
  - Conferencing
  - Voice Mail
  - Trunking
- Trunking is a feature where a phone on one PBX can call another phone on a different PBX

# Hardware

- Raspberry Pi or PC
- Power supply
- Network
- Ethernet cable(s)
- Phone

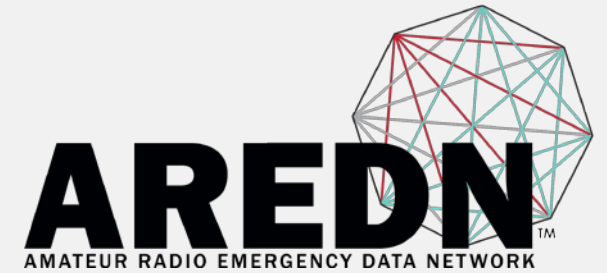

# Free PBX

- Widely used PBX is FreePBX
- Available for
  - Rapsberry Pi
  - PC
  - Other platforms
